Quality Assurance Requirements

This unit standard and others within this subfield may be awarded by institutions which meet the accreditation requirements set by the Namibia Qualifications Authority and the Namibia Training Authority and which comply with the national assessment and moderation requirements. Details of specific accreditation requirements and the national assessment arrangements are available from the Namibia Qualifications Authority and the Namibia Training Authority on www.nta.com.na

Elements and Performance Criteria

Element 1: Plan and prepare for work

Range

Planning and preparation may include but is not limited to workplace inspection, equipment defect identification, assessment of environmental conditions ,hazards and determination of work requirements. Tools and equipment may include but are not limited to combs, sectioning clips, pins, rubber bands, and ribbons. Products may include but are not limited to holding products, moulding cream and gel.

Performance Criteria

- 1.1 Work instructions, including job card, client history record and product details are obtained, confirmed and applied.
- 1.2 Safety requirements are followed in line with safety plans and policies.
- 1.3 Tools and equipment selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults reported.
- 1.4 Products are safely handled and located ready for use in line with workplace procedures.
- 1.5 Measurement requirements for products are sourced and implemented in line with manufacturers' specifications and workplace procedures.
- 1.6 Environmental protection requirements are identified and applied in line with environmental plans and regulatory obligations.

Element 2: Prepare client for perm service

Range

Preparation methods may include but are not limited to procedures for using towels, apron, brush and comb.

Performance Criteria

- 2.1 Procedures and information required for preparing client for perm service are identified and sourced in line with workplace procedures.
- 2.2 Preparation methods are applied to ensure client's protection in line with workplace procedures.
- 2.3 Jewelleries and clothing are removed in line with salon procedures.
- 2.4 Client comfort and safety is ensured throughout the perming service and in a professional manner.

Element 3: Analyse the hair and scalp

Range

Perming rod diameter includes the different size and shape rods.

Winding techniques may include but not limited to brick, on base, over directed, under-directed, spiral, weave, stack winding, perming, textured and combination winding.

Performance Criteria

- 3.1 Procedures and information required for analysing the hair and scalp are identified and sourced in line with workplace procedures.
- 3.2 Client's hair is analysed through questioning and physical examination.
- 3.3 Information and recommendations regarding the perming service are captured on the client's record card.
- 3.4 Appropriate tools, equipment and products are selected based on the result of the analysis of the hair and scalp.
- 3.5 Permanent wave products and strength, rod size and winding/blocking techniques are selected based on the analysis results.

Element 4: Prepare hair for perm service

Range

Products may include but are not limited to barrier cream and porosity equalizer.

Performance Criteria

- 4.1 Procedures and information required for preparing hair for perming service are identified and sourced in line with product specifications and workplace procedures.
- 4.2 The methods and techniques for performing perming service are chosen.
- 4.3 The hair is shampooed in line with manufacturer's instructions prior to perming service.
- 4.4 A barrier cream is applied in line with manufacturer's instructions.
- 4.5 Porosity equalizer is applied if necessary in line with manufacturer's instructions.
- 4.6 Client's hair is sectioned in line with perming service requirements.

Element 5: Perform perming application techniques

Range

Clients' safety may include but is not limited to eyes, ears and neck protection using suitable barrier products.

Performance Criteria

- 5.1 Procedures and information required for performing perming application techniques are identified and sourced in line with product specifications and workplace procedures.
- 5.2 Client's hair is sectioned based on the rod width and diameter.
- 5.3 End papers are applied.
- 5.4 The hair is evenly distributed across the rod and correct tension is applied and the perming rods are secured in line with the salon procedures.
- 5.5 The permanent wave product is applied to every rod.
- 5.6 The curl development is monitored, timed and checked in line with manufacturer's instructions.
- 5.7 The perm product and process are done according to the hair texture
- 5.8 Hair is thoroughly rinsed to remove perm lotion and excess water
Is removed

Element 6: Neutralise a perm and apply after care to hair

Range

Preparation methods may include but are not limited to procedures for using towels and aprons to protect clients from water and spillage.

Finishing products are applied and aftercare is recommended.

Performance Criteria

- 6.1 Procedures and information required for neutralising a perm are identified and sourced in line with product specifications and workplace procedures.
- 6.2 Client is seated comfortably at the washbasin.
- 6.3 Hair is neutralised in line with manufacturer's specifications and workplace procedures.
- 6.4 The neutralising process is completed in a time frame compatible with the manufacturer's instruction and hair.
- 6.5 The perm rods are removed in line with salon and manufacturer's instructions.
- 6.4 After care product is selected and procedure is carried out in line with manufacturer's specification and workplace procedures.

Element 7: Rinse and apply after care products

Range

After care products may include but not limited to hairspray, hair lotions, gels, mousse and wax

Performance Criteria

- 7.1 Procedures and information required for rinsing and finishing off perm service are identified and sourced in line with product specifications and workplace procedures.
- 7.2 Hair is rinsed and after care products are applied to finish off the perming procedure.
- 7.3 The client is advised of home care treatments and products to maintain the hair perming service.
- 7.4 After care product is selected and procedure is carried out in line with manufacturer's specification and workplace procedures.

Element 8: Complete work and clean up

Range

Work completion details may include but are not limited to job card and client history record.

Reusable materials may include but are not limited to towels, capes, aprons, glasses and cups.

Performance Criteria

- 8.1 Work is completed and appropriate personnel notified in line with workplace procedures.
- 8.2 Work area is cleared of waste, cleaned, restored and secured in line with workplace procedures.
- 8.3 Reusable material is collected, cleaned, disposed and or stored in line with workplace procedures.
- 8.4 Equipment used is cleaned, maintained, checked for serviceability and stored in line with workplace procedures.
- 8.5 Work completion details are finalised in line with workplace procedures.
