Title:

JOINERY AND CABINET MAKING
**Transport and store materials and
finished products**

Level: 2

Credits: 3

Purpose

This unit standard specifies the competencies required to transport and store materials and finished products. This includes handling materials and finished products safely, transport materials and finished products, and storing materials and finished products.

This unit standard is intended for those who work as joiners and cabinet makers.

Special Notes

1. Entry information:

Prerequisite:

- 1157-*Demonstrate basic knowledge of workplace health and safety or demonstrated equivalent knowledge and skills.*

2. To demonstrate competence, at a minimum, evidence is required of the safe and efficient transporting, storing materials and finished products.

3. Transport equipment may include but are not limited to forklifts, trolleys, overhead cranes, elevated platforms, lifts, trucks, vans, wheel barrows, light utility vehicles.

4. Materials and finished products to be transported maintained and stored in line with legislative, manufacturers' and workplace requirements.

5. Assessment evidence may be collected from a real or simulated workplace in which joinery and cabinet making operations are carried out.

5. All inspection, operation and maintenance procedures associated with the use of tools and equipment shall comply with manufacturers' and company guidelines, instructions, and reasonable flat rate time.

6. Regulations and legislation relevant to this unit standard include the following:

- Labour Act No 11, 2007 as amended;
- SABS 0400, NOSA, Local Authorities Act;
- Occupational Health and Safety Regulations No. 18, 1997 and all subsequent amendments.

Quality Assurance Requirements

This unit standard and others within this subfield may be awarded by institutions which meet the accreditation requirements set by the Namibia Qualifications Authority and the Namibia Training Authority and which comply with the national assessment and moderation requirements. Details of specific accreditation requirements and the national assessment arrangements are available from the Namibia Qualifications Authority on www.namqa.org and the Namibia Training Authority on www.nta.com.na.

Elements and Performance Criteria

Element 1: Handling materials and finished products safely

Performance criteria

- 1.1 Methods for the safe handling of materials and finished products are identified and assessed in line with workplace procedures.
- 1.2 Materials and finished products are safely handled in line with workplace procedures.

Element 2: Transport materials and finished products

Performance criteria

- 2.1 Methods of transporting materials and finished products are identified.
- 2.2 Volume and weight of loads to be transported is checked for compliance with appropriate means of transport.
- 2.3 Safely stacking and securing using appropriate protective methods in line with workplace requirements are explained and demonstrated.
- 2.4 Materials and finished products are transported in a manner consistent with safety, legislative and workplace requirements are demonstrated.

Element 3: Store materials and finished products

Performance criteria

- 3.1 Storage methods for different materials and finished products are explained and demonstrated.
- 3.2 Materials and finished products are safely stored using correct methods, procedures and standard practices.
